

W+D Quality Services

Improve your company's performance with the help of our comprehensive and high-quality service portfolio

Train + Excel

Certified W+D Training for Operators

Training for optimal operation of your W+D machine

Learn about the machine and its functions from our experienced trainers and prepare yourself to operate the machine after completing these training sessions. The successful combination of theoretical content and practical exercises ensures maximum training success. The contents of this training and the knowledge you'll gain form the basis for all later related training courses.

After successful participation, each participant will receive detailed training documents, a user manual, and a W+D training certificate.

Prerequisite: No special skills.

Training languages: English and German, translator to be decided on

Target audience: New customers and machine operators with or without prior knowledge

Content

/ **Safety instructions**

Explanation and instructions on general and machine-specific safety rules and regulations

/ **Introduction to the machine**

Explanation of how the machine is built, its sections and the individual stations, explanation of all functional groups

/ **Introduction to the control panel**

Explanation of and introduction to the basic functions of the control panel for operators, explanation of the help functions

/ **Main functions of the machine**

Presentation of the main crucial functions and central components

/ **Handling of machine and auxiliary units**

Operation of the machine, the tissue and foil reel splicer

/ **Machine overview**

Explanation of the main operating modes, explanations of the spare parts catalog and the web shop

Machine type: W+D FLOWTOS

Duration: 5 days
