The logo for W+D, featuring the letters 'W' and 'D' in a bold, white, sans-serif font, with a plus sign between them. The logo is set against a dark purple background that is part of a larger graphic element on the right side of the page.

Train + Excel

Certified W+D Training for Machine Adjusters

Training for optimal handling and operation of your W+D machine

The W+D training for machine adjusters will provide you with all the information that you need to operate the system independently, both practically on the machine and in theoretical learning phases. You'll gain comprehensive knowledge on the relevant modules and possibilities directly at the machine. The training by the W+D training experts is rounded off by extensive help and explanations on troubleshooting, maintenance and taking care of the machine.

After successful participation, each participant will receive detailed training documents, a user manual, and a W+D training certificate.

Prerequisite: Completed W+D Operator Training (courses in the classroom or online training).

Training languages: English and German, translator to be decided on

Target audience: New customers, machine operators and machine adjusters

Content

/ **Control panel with all relevant functions**

Explanation of the formula and format pages as well as monitoring and zero points

/ **Settings**

Explanation of the relevant setting possibilities

/ **Format changes**

Explanation of the methodology and demonstration of a format change based on a check list; practical performance on the machine

/ **Troubleshooting**

Description and instructions on structured troubleshooting, explanation of the steps and possibilities for quick problem solving, troubleshooting with simulated process errors, possible steps on working with W+D experts

/ **Maintenance and inspections**

Instruction of the relevant maintenance and inspection activities for the optimal and smooth operation of the machine
