

W+D upgrade for the flexible production of Block-Bottom Pockets

Examples of packaging common to the industry

Sustainable solutions for light and e-commerce packaging and stationary trade

In order to avoid plastic and meet the set global climate targets, the demand for ecommerce shipping, gift, hygiene, gardening and food packaging made from environmentally friendly paper is continuously increasing every year.

Take advantage of this increased demand and the flexibility of your existing W+D machine by upgrading your system with our upgrade package for the production of block-bottom bags, folded gussets and similar products.

Use it to expand your product portfolio beyond envelopes or pockets and produce a wide variety of light and e-Commerce shipping packaging. You will be able to offer future-proof solutions to new customers and thus utilize your production lines to the full. An investment that will quickly pay off for you!

Suitable for machine types

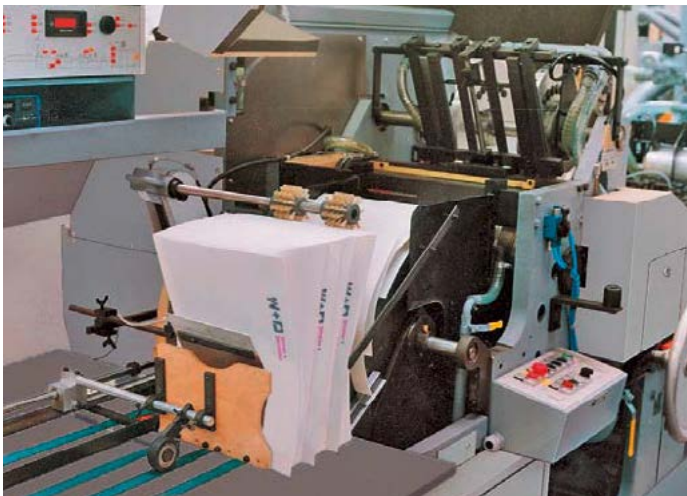

W+D 249

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
