

W+D Main Drive Retrofit NT

Old drive technologies confront us with more and more challenges in everyday operations: The spare parts supply is getting problematic over the years and there is also a high failure potential. Our innovative W+D Modernization Team has now developed an efficient alternative solution for the outdated Faurndau motors.

Solution

The Faurndau motor is replaced by a state-of-the-art asynchronous servomotor. The motor control systems have been specifically designed for and fine-tuned to your installed machines to ensure their durability and consistent performance.

Advantages

- / Integrated safety control system for overspeed and unintentional start-up monitoring
- / Additional STOP buttons to ensure a safe stop of the machine within a braking ramp (optional)
- / Pre-installed components to ensure fast installation on site
- / High energy efficiency
- / Lower acquisition and maintenance costs

If you have any questions, please contact your W+D representative.

Suitable for machine types

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
