

Upgrade

Softwareupgrade BSC 4.0

W+D Upgrade of the Inserting Machine Control System from BSC 2.0 / BSC 3.0 to BSC 4.0

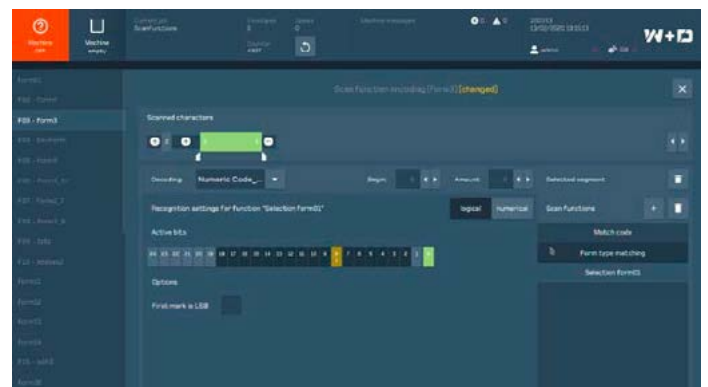

Upgrading your machine control system from BSC 2.0 to BSC 3.0 is the right step to secure your machine availability. But if your aim is high-end performance in addition to the well-proven BSC 3.0 tools – “Work in Progress, infinitely variable speed adjustment, job templates, and remote support” – an upgrade to our innovative BSC 4.0 with its 22” touch screen control panel is a huge step into the future.

The system provides a clear numeric and graphic overview of all machine, process, and job data while allowing for the in-depth analysis of these data.

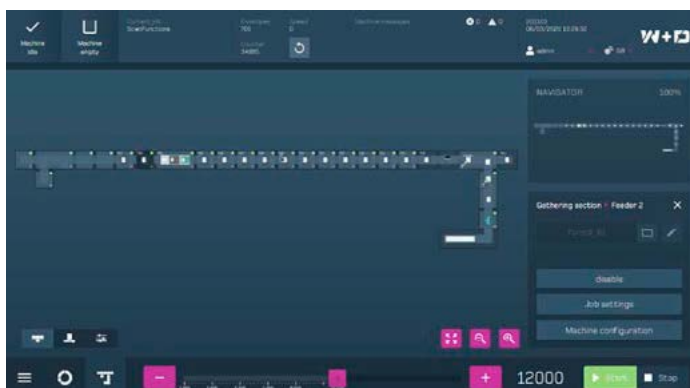

The BSC 4.0 upgrade is available for machine type W+D BB700 machines built after 2007 and following the verification of the used hardware and software versions as well as the configuration status. For more information, please contact your W+D sales contact.

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
