

## Lake Camera Interface Box

Until now, moving Lake Cameras from one feeder to another has always required laying three cables to the new camera position in order to be able to process all signals.

### Solution

By installing the Lake Camera Interface Box, you will save yourself the effort of laying the three required system cables. Only the data cable has to be run from the PC to the new camera position, while the Interface Box will take care of all other signal conversions.

### Advantages

Integrating the Lake Camera Interface Box will reduce your changeover time up to 2/3. What is equally important is that the well-arranged machine interior will ensure order and safety at your W+D unit.

Another highlight is the extremely fast and easy camera assignment within our innovative BSC 4.0 user interface: You can link the camera to a new feeder with just one click.

### Suitable for machine types

W+D BB550 XL, W+D BB700 (S2), W+D BB820

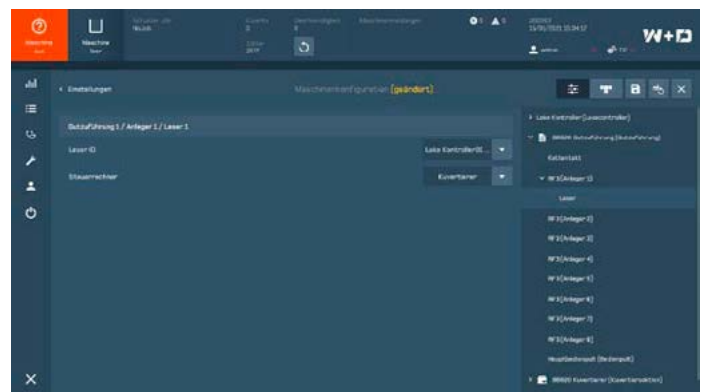

### Specification

#### Camera Interface Box

Order number: Y 132.807

#### Adapter

Order number: Y 132.837

**Winkler+Dünnebier GmbH (W+D)**, part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
