

Second Level Suction Belt

You have the demanding task of personalizing your supplements, sticking a card on, or adding coins. You also want to send the supplement face up or face down. All this needs to happen in one go and at top speed

Solution

The installation of a W+D suction belt on your existing machine.

Advantages

You can produce a variety of special solutions. Even standard solutions can be enveloped via the suction belt. The products are, as usual, supplied reliably through our feeders RF2, HF2 or SF2. At the end of the suction section, you can use a turning belt to decide which side the insert should lie on. Of course, you can also select individual modules from the variant shown.

We recommend that the conversion and the adjustments be carried out by our service technicians. Please talk to your service consultant about the many different applications of the W+D suction belt.

Suitable for machine types

W+D BB 700 16k S2
W+D BB 700 Plus 16k S2
W+D BB 550 XL S2

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmler and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
