Product alignment with the active collection tray

Due to the process, ejected supplements are not always stacked at a 100 percent accurate angle in the product supply. In most cases, this is not a problem. But what if your customer needs exactly this?

Solution

In order to ensure a precise alignment for this type of supplement, we have developed the active collection tray, which works behind the feeder and is simply placed on a free feeder station. The supplements or the supplement stack are arranged by two fingers as they travel from second level even before they reach the product supply.

Benefits

Our new development ensures absolute precision at very low cost. The format changeover is fast, easy and freely adjustable. In addition, the collection compartment is easy to handle and can be installed or uninstalled by your own team.

Suitable for machine types

W+D BB 700 16K S2 with BSC 3.0/version 3_3_15 and an SPS version 3_5_20

Technical Data

Max 5,000 pieces/hour

Order numbers

Stopper pneumatic Y 300,000.243

Cover Hood Y 300,000.245

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
