

Autoloader SL2 double

High speeds for longer periods usually also mean strain on man and machine. Often inputting complicated supplements can be so time-consuming that the other feeders cannot be filled quickly enough. This leads to standstill and loss of production.

Solution

With this upgrade it is possible to connect a second SL2 autoloader to the existing one.

Advantages

- / This allows one feeder per assembly group to generate a significantly higher feed.
- / The operator can achieve maximum productivity at absolute peak performance of the machine.
- / Of course, after removing the upgrade, the second autoloader SL2 can also be used as a separate master device on a different position.

Suitable for machine types

W+D BB 300 / BB 600 / BB 700 / BB 550 XL

For more information about the dual autoloader, please contact our W+D service team.
