

Conversion kit 16K gripper guide for 14K systems

The gripper guides of the proven W+D BB700 14K are more rigid than those of the newer 16K models. This leads to increased wear and tear on the grippers and the guide bars and to an unreliable or nonparallel envelope transport.

Solution

To solve this issue, our more modern machines of the W+D BB700 16K series already incorporate more flexible gripper guides. With our conversion kit, you will be able to integrate this technology into W+D BB700 14K series machines as well.

Advantages

- / Longer service life of gripper guides and guide bars
- / Smoother envelope transport, leading to a significant reduction in inserting errors
- / Cost-effective partial modernization of your inserting system

We recommend having the conversion done by a W+D Service Technician.

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
