

## Handwheel for optimized BB700 Envelope Autoloader Adjustment

Size changes require the fast and precise adjustment of the conveyor belt at the envelope feeder to ensure a smooth and interruption-free running of the machine at maximum production speeds.

### Solution

The incorporation of our handwheel provides for the highly efficient, optimized positioning of the conveyor belt in relation to the envelope feeder. The adjustment is then done using a toothed rack, which is moved by the handwheel.

### Advantages

The handwheel allows for the fast, easy, and precise adjustment of the conveyor belt. This significantly cuts down setup times while making the operator's work physically less demanding.

If you choose the cost-effective option to install the handwheel upgrade by yourself, we will be happy to provide you with installation instructions on request.

### Suitable for machine types

W+D BB550XL and W+D BB700 14k or 16K

### Order number

Y 300.000.755

**Winkler+Dünnebier GmbH (W+D)**, part of global equipment manufacturer Barry-Wehmler and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
