

W+D ramp for RF2 and HF2 feeders

Jobs that make it necessary to feed the master document from a different position rather than from a system channel or the first feeder position have always required time-consuming feeder modifications. Until now.

Solution

By installing one or several W+D ramps in the gathering section underneath the RF2 or the HF2 feeder, it is now possible to control the desired product order for your jobs directly.

Advantages

The installation of W+D ramps will eliminate the need for feeder modifications and will shorten your job time changes significantly and be more efficient.

We recommend having the conversion done by a W+D Service Technician.

Suitable for machine types

W+D BB700 S2(S1) and W+D BB550 XL

Technical specifications

Max. product length: 148 mm (5 ⁵³/₆₄")

Max. product speed: 5,000 – 10,000 products/hours, depending on the job and material

Order number

Y 300.000.741

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmillers and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
