Modified vacuum sucker for a reliable transportation

All of our RF2 feeders are delivered with a single piab valve. In the course of the product transport via vacuum there may be interruptions due to various factors like the material surface, thickness and quality. The modified vacuum sucker with up to three pumps and piab valves is a product extension that ensures a constant vacuum flow without disruptions for a better process stability and less waste.

Module	System	Package Content	Vacuum Reaction Time	W+D no. mechanical	W+D no. electrical
Envelope opener inserter	S1+S2	3 single pumps 3 valves	33ms	Y 300.000.703	Y 131.480
Envelope feeder	S1+S2	2 additional vacuum pumps 3 valves	50ms	Y 300.000.543	Y 131.480
Rotary feeder 2	S1	3 single pumps 3 valves	50ms	Y 300.000.705	Y 131.480
Rotary feeder 2	S1	2 additional vacuum pumps 3 valves	50ms	Y 300.000.832	Y 131.480
Rotary feeder BF 2	S2	Update kit – 3 pumps 1 valve	18ms	Y 300.000.628 Y 300.000.809 Y 130.102 (cover)	Software-Update Only feeder
Rotary feeder BF 2	S2	Triple vacuum pump 2 additional pumps – 1 valve	18ms	Y 300.000.809	Software-Update Only feeder

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
