

W+D 627 Automatic Dryer Chain Run-out

Delays, failed start-ups, and good products ending up in the paper container are common consequences in envelope production after machine standstills. In reality though, most products in a stopped drying run are of perfect quality.

Solution

Therefore, avoid unnecessary waste and delays when your W+D 627 is stopped. Retrofit this machine and invest in our automatic Dryer Chain Run-out which you will already be familiar with from our W+D 410 and W+D 628 machines.

Advantages

- / Each good product in the drying run is moved to the delivery to become a sales product
- / Production output increases significantly
- / Failed start-up attempts are reduced enormously
- / Better availability of personnel
- / More productivity in converting hot-melt envelopes

Machine types

W+D 627 from 2008 or later with machine numbers from M 15.855 and higher

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
