

Machine type W+D 627

Nozzle gumming for side flaps

Brief description

This package includes an extrusion system to apply adhesive to the envelope side flaps. The system can augment or replace the standard gum box.

Description of modification

The package includes all mechanical and electrical parts required for the extrusion system to apply adhesive onto the side flaps and is available in two different variations:

Package 1

Parts for extrusion gumming in addition to the existing side flap gum box

Package 2

Parts required to replace the existing gum box

Advantages

- / Size-dependant gummers no longer required
- / Eliminates glue sling and related down time for cleaning
- / Easy push button adjustment of glue length, even during production
- / Memory for different glue settings of the different envelope sizes
- / Exclusively for the production of straight glue lines. For commercial or diagonal envelopes, the standard gum box is required.

Nozzle gumming
