

Machine type W+D 627

Peel and seal unit guide rollers

Brief description

Peel and seal silicon web guide rollers coated with silicon rubber.

Description of modification

The guide rollers directly in contact with the hot melt adhesive are exchanged with rollers coated with a silicon rubber. Easy installation by your staff without W+D support.

Advantages

- / Higher quality envelope as less adhesive is removed from the web versus the older taped guide rollers
- / Faster and easier clean-up
- / Reduces labor as re-taping of the cylinders is no longer required

Guide roller in the peel and seal unit

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
