Machine type W+D 627

Register control unit

Brief description

Retrofit package consisting of an electronic register control system to run pre-printed paper reels.

Description of modification

This upgrade enables the machine to process pre-printed paper rolls in register and includes all necessary hardware and software. The register accuracy is +/- 1.0 mm. It is recommended that the in-register splice upgrade for the W+D 191 splicer also be integrated to help reduce waste associated with automatic roll changes.
Advantages

/ Increases efficiency of the machine
/ Expands product portfolio of the machine

Register control through preprinted register print

Product diversity through register control

Winkler+Dünnebier GmbH (W+D), part of global equipment manu-
facturer Barry-Wehmiller and its BW Converting Solutions platform of
five industry leading brands, specializes in the design and manufacture
of high-performance converting machinery for the tissue, nonwovens,
hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering
company to cover the entire envelope mail production value chain: from
converting, printing and value ad enhancement systems for the manu-
facturing of envelopes to highly intelligent mail inserting technology. All
with the aim to produce the most complex and personalized letter mail
packages for postal system intake. Whether you produce envelopes for
transactional mail, direct mail, lightweight e-commerce or special pack-
aging made of paper – we are your solutions partner.
