

Machine type W+D 627

2nd control valve

Brief description

A second vacuum control valve for the operator side of the 300mm wide patch application unit.

Description of modification

On the operator side of the window material transport cylinder, a second control valve is mounted that ensures a reliable transport of wide window materials. This second valve increases the amount of vacuum available across the cylinder and is also equipped with a supply of fresh air to aid in the application process.

Advantages

- / More reliable transport of wide window material to the envelope
- / Increased reliability of window placement onto the envelope
- / Improved efficiency when running wide window materials

Second control valve on the window material conveying cylinder
