

Machine type W+D 627

Separation roller gripping segments

Brief description

Replacement of gripping segments by coated segments.

Description of modification

The existing, uncoated segments on the separation roller are replaced with specially coated segments. This results in an improved grip of the paper and ensures a more reliable transport of the blank.

Advantages

- / Safe transport of blank
- / Improved grip of paper on the segments

Separation roller with coated gripping segments

Winkler+Dünnebier GmbH (W+D), part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
