

## W+D Web-Edge-Trimming-Unit

Increase the flexibility of your production systems with the option of adapting the paper roll widths to the respective order during the production run.

With the W+D Web-Trimming-Unit you are able to process the right roll width on your envelope machine – even in the event of delivery bottlenecks. Simply cut the slightly wider roll in the machine's cutting tower.

You can still use rolls with damaged edges for orders. Equip your envelope machine with the W+D Web-Trimming-Unit. Contact our responsible sales representative.

### Features

- / Cutting of both or one web edges
- / Processing of paper rolls with damaged edges
- / Processing of paper rolls with excess width
- / Useable tool to produce orders if the paper comes not on time from the paper mill

### Suitable for machine types

W+D 627 web machines

Adaptable to any other web machine

**Winkler+Dünnebier GmbH (W+D)**, part of global equipment manufacturer Barry-Wehmiller and its BW Converting Solutions platform of five industry leading brands, specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, hygiene, package-printing and bag-converting industries worldwide.

With more than 100 years of experience, W+D is the only engineering company to cover the entire envelope mail production value chain: from converting, printing and value ad enhancement systems for the manufacturing of envelopes to highly intelligent mail inserting technology. All with the aim to produce the most complex and personalized letter mail packages for postal system intake. Whether you produce envelopes for transactional mail, direct mail, lightweight e-commerce or special packaging made of paper – we are your solutions partner.
